★★★★★ Italian   ★★★★☆ English   ★☆☆☆☆ Japanese

Front-End: React | JavaScript | TypeScript | Bootstrap | TailwindCSS | Jquery

Back-End: PHP | GO | Laravel | Node | Rust | Solidity

DB: MySql | PostgreSql | NoSql (MongoDB)

DevOps: Linux | Docker | AWS | Azure | Apache | Nginx

Experienced Web Developer adept in all stages of advanced web development. Knowledgeable in user interface, testing, and debugging processes. Equipped with a diverse and promising skill-set. Able to effectively self-manage during independent projects, as well as collaborate in a team setting.

Experience

March 2023 – Present

Full-Stack Developer at Wavenure S.r.l

- Full Stack Developer at Wavenure, an innovative Fintech company utilising AI for investment optimisation.
- Responsible for creating dashboard and application solutions using cutting-edge technologies such as React and Node.js.
- Developed web-based interfaces and APIs for orders management and brokerage services, ensuring powerful and efficient investment services.
- Successfully diagnosed and resolved website problems, maintaining consistent adherence to application methods and quality standards.
- Managed end-to-end development and DevOps, optimising both front-end and back-end performance.
- Played a pivotal role in the startup's journey from concept to MVP, demonstrating expertise in rapid development and deployment.
- Collaborated with cross-functional teams to provide tailored investment solutions, contributing to enhanced decision-making processes.
- Ensured transparent and explainable AI integration within the platform, maintaining user trust and control.
- Designed and developed privacy-focused smart contracts using Solidity, ensuring top-tier confidentiality standards for our clients.

March 2015 – Present

Co-owner at BB4COM, Milano

- Leveraged a diverse technology stack including PHP, Laravel, React, jQuery, SQL, and NoSQL databases to develop a wide range of projects, from eCommerce web applications to NFT marketplaces.
- Developed feature-rich e-commerce web applications, integrating secure payment gateways, customisable product catalogs, and user-friendly shopping carts to enhance online shopping experiences for clients and their customers.
- Designed and implemented NFT marketplaces, utilising blockchain technology to enable artists and collectors to trade digital assets securely and efficiently, showcasing a deep understanding of both frontend and backend requirements.
- Demonstrated expertise across the entire development spectrum, seamlessly bridging frontend and backend components to create cohesive and responsive web applications that met clients' unique requirements.
- Utilised SQL and NoSQL databases to manage and organise data effectively, ensuring optimal performance and scalability for applications handling various types and volumes of data.
- Collaborated closely with clients to understand their business goals and translate them into technical solutions, delivering high-quality projects on time and within budget, establishing a reputation for reliability and client satisfaction.
- Remained knowledgeable in new standards, technologies, and trends in website development.
- Worked to meet client deadlines.

Istruzione

Digitazon Tech School, Milano Certificate

- I successfully completed an intensive coding bootcamp where I gained hands-on experience in a range of essential programming technologies. This comprehensive program covered a diverse set of skills, including TypeScript for building robust and scalable web applications, PHP for server-side scripting, Laravel for developing efficient and elegant web solutions, and SQL for proficiently managing and querying databases.
